**Index**

**Answer Key**
Time to Talk Vocabulary Builder is a five-level, ten-book series designed to assist students in their English vocabulary studies as they progress from the foundational level through to the upper intermediate level. The words and activities featured in the series become progressively more challenging to meet the needs of students at different stages of their English language development.

Vocabulary

The words featured in Time to Talk Vocabulary Builder are high-frequency words encountered in both spoken and written English. Students will find the words invaluable in their study of English. Twenty words are introduced in each unit. Over the course of one book, students will encounter 400 words—or 4,000 over the course of the whole series. Each word is introduced with a definition and example sentence, allowing students to see words in context from the outset. Pictures accompanying the definitions provide clues to help students to visualise the words and form related associations—an important part of memory and recall.

Activities

The activities in each unit provide students with extensive exposure to the target words of that unit. Activities are designed to give students the opportunity to think about the meaning and usage of the vocabulary, and the relationship between the target words and other words. Each unit contains a short dialogue containing some of the target vocabulary in a new context, followed by comprehension questions. A review section provides an opportunity for students to test their understanding and recall of the words.
How to Use

Words to Learn
- Students are encouraged to write each word in their native language, creating a personal dictionary for future reference. They should study the pictures and see how they relate to the example sentences. Focusing on the images will enable students to create their own mental image for each word, which will assist with retention of the word and its meaning.
- Students can make flashcards with the target word on one side and the definition and example sentence on the other. Alternatively, students can write the target words on one side and a translation of the word on the back.

Practice
- Students test their understanding and ability to use the new words through six practice activities. These activities target recognition of the words and their related images, usage of the words in different contexts, and understanding of the meaning of the words.
- For additional practice, students can create their own example sentences for each word.

Read and Review
- The Read section contains some of the words in a dialogue. Students see the words in a new context and test their recall of the meanings of the words. Reading comprehension questions are provided to reinforce the language.
- Review provides a global review of the contents of the unit. Students can work alone to test themselves, or work with a partner to make this into a more collaborative review activity.
Learn the words. Write each word in your language.

1. **after**
   - **prep.** at a time following something or someone
   - → The letter B comes after the letter A in the alphabet.

2. **answer**
   - **n.** something you say or write in response to a question
   - → Please write your answers on the paper.
